

# Food waste

**YES**

- Pasta, rice
- Leftover bread, eggshell
- Leftover vegetables, fruit
- Leftover meat, fish, shellfish
- Tea leaves, coffee grounds, filters

**NO**

- Nappies, sanitary towels
- Dust, vacuum cleaner bags
- Ice cream sticks, chopsticks
- Soil, pot plants, cut flowers
- Bottle tops
- Snuff ("snus"), cigarettes, ash
- Soup, drinks, sauce
- Wax candles

## Tips and advice

Biological treatment converts food waste to biogas, biofertiliser or compost soil. Biogas can, for example, be used to run cars and buses, while biofertilisers return nutrients to farmlands for new food production.
