

Small batteries

YES

- All batteries under 3 kg

NO

- Car batteries
- Large batteries used for business machinery and equipment

Tips and advice

Batteries are hazardous waste and shall not be combined with other types of waste. Tape the battery's poles to reduce the risk of fire. Large batteries used for operating machinery and equipment as well as car batteries can be returned to the supplier, MTA or other integrated service, otherwise, follow local hospital routines.

Batteries are collected by Elkretsen. For more info, see www.elkretsen.se
